

Coursework Checklist

Incoming Graduate Students

Geosciences

Student: _____ A#: _____ Advisor: _____

Track: _____ MS-Geology Specialization: _____

Previous Education

University: _____ Major: _____

Geoscience Courses:	Grade:	Geoscience Courses:	Grade:
Introductory or Physical Geology with lab		Geomorphology	
Mineral and Rocks (Earth Materials)		Structural Geology	
Historical Geology		Field Methods or Experience	
Sedimentation & Stratigraphy			

Other Geoscience Courses:

Mathematics Courses:

Chemistry Courses:

Physics Courses:

Notes about missing science courses:

Notes about research experience:

Recommendation for Missing Prerequisites: Advisory Committee

What coursework-related items need to be completed?

Excerpted from the Graduate Handbook and Policies:

*“Although not strictly an admission requirement, individual students may need to complete specific undergraduate coursework to prepare them for their graduate program. **Decisions about any exceptions to the 7 core prerequisites in a student’s graduate program are made by a student’s Advisory Committee in their first meeting.** MS-AEG students are expected to have 4 of the 7 core classes. These undergraduate Geology courses cannot appear on the graduate Program of Study, nor can they be officially audited. Thus, completion of these prerequisites generally will be accomplished through lecture attendance and the passing of the regular exams in the courses.”*
